DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 96-115, drawn to method, classified in class 438, subclass 106+.
- II. Claims 1-50 and 53-95, drawn to device, classified in class 257, subclass 690+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process of group I can be used to make materially different products such as three dimensional ICs or SOI TFT devices.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

A telephone call was made to Kristine Strodthoff on 4/16/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2813

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
